University of Louisville  
Room 208  
Clinical Translational Research Building  
505 S. Hancock Street  
Louisville, KY 40202

Dear Dr. Rodu,

Thank you for your email. We have received all of your correspondence, both printed and electronic, related to the manuscript "Electronic cigarette use and myocardial infarction among adults in the U.S. Population Assessment of Tobacco and Health [PATH]," by Dharma N. Bhatta and Stanton A. Glantz, published in the Journal of the American Heart Association on June 5, 2019. The JAHA editorial office confirmed receipt of your previous inquiries on July 18, 2019.

The AHA continues to follow the guidelines as outlined by the International Committee of Medical Journal Editors (ICJME) and the Committee on Publication Ethics (COPE), which include protecting the integrity of the scientific publishing process. No additional information is available regarding the Glantz et al. paper.

The American Heart Association is steadfastly committed to ensuring an objective and thorough evaluation of any and all inquiries received about studies published in any of our journals.

Please direct all future inquiries to the JAHA Editorial Team at this email address. Each journal is independently managed by their respective editorial teams. All research and opinions published within the journals are independent of the American Heart Association.

Sincerely,

*JAHA: Journal of the American Heart Association*
