

REASON-RUPE Public Opinion Survey

JANUARY 2013 TOPLINE RESULTS

RELEASED: JANUARY 31, 2013

The Reason-Rupe January 2013 Poll interviewed 1000 adults on both mobile (500) and landline (500) phones, including 228 respondents without landlines from January 17 to 21, 2013. The margin of sampling error is +/- 3.8%. The margin of error increases for open-ended questions asked of subsets of the survey sample. Princeton Survey Research Associates International (PSRAI) conducted the survey. Interviews were done in English by Princeton Data Source LLC. Statistical results are weighted to correct known demographic discrepancies. When feasible, answer choices within questions were rotated. For more methodological information, please visit <http://reason.com/reason-rupe-poll-methodology>.

The poll questionnaire, crosstabs, and analysis can be found at reason.com/poll.
