CALIFORNIA OCTOBER 2012 TOPLINE RESULTS

The Reason-Rupe October California 2012 Poll was conducted October 11th-15th 2012 of both mobile (229) and landline (467) phones among 696 adults living in California, margin of error +/- 3.8%. 106 of these respondents do not have a landline phone. 508 respondents were identified as likely voters, based on those who are registered to vote and say they definitely or will probably vote as well as those who have already voted. The margin of error for likely voters is +/-5.1%. The survey was conducted by Princeton Survey Research International. Interviews were done in English and Spanish by Princeton Data Source, LLC.
